

The Power to Solve

TANGENT

We think tangentially

Edward De Bono made a remarkable contribution to the thinkers in society by giving them a totally different line of thought called Lateral Thinking. Years later a group of individuals joined hands and gave a fresh approach to problem solving and named it Tangent Solutions.

Tangent Solutions is a diversified global company with interests in product development, services and consulting with state-of-the-art development centers in Chicago (USA) and Hyderabad, India. The company is spreading its expertise to different domains like Banking, Media and Education. Tangent Solutions forms a vital link between business and technology, offering a wide range of software services to clients around the globe.

Tangent Solutions has been incorporated by a group of industry NRI veterans with a worldwide average experience of over 20 years with a common underlying spirit of passion to harness and channelize the collective intelligence for the benefit of the society and the world at large.

Vision

To be a preferred choice partner globally through exciting, innovative, best of breed products and solutions and to be respected for the commitment to a customer's cause as well as the responsibility shown towards overall development of stake holders and society in general.

Our quest has always been to maximize client satisfaction with a firm commitment to the global economy. We endeavor to leverage our core competencies in order to help our clients successfully respond to changing technologies. Our innovative approach and long term relationships with our clients have been the catalyst to our growth. Operating from our international headquarters in Chicago and our office in Hyderabad, we are able to focus all our energy towards realizing our vision.

Core Values

Our core values are our driving factors and fundamentals for our success. These core values define our character and shape our culture. They form the backbone of the organization and guide us in our action and in decision-making.

- Integrity
- Excellence
- Success for stakeholders

Unique Features of Our Business

• Innovation is our lifeline

At Tangent we believe that Innovation is the lifeline not a differentiator, which not only gives us competitive advantage but also keeps us motivated to achieve more.

• Diversification

Our products cater to the needs of diverse domains like IT- Human Resources, Banking & Finance, Education and Government.

• Flexibility and User Centered

Our products are highly flexible and completely customizable. Our products are 'User Centric' which make the products highly intuitive, interactive and easy to use.

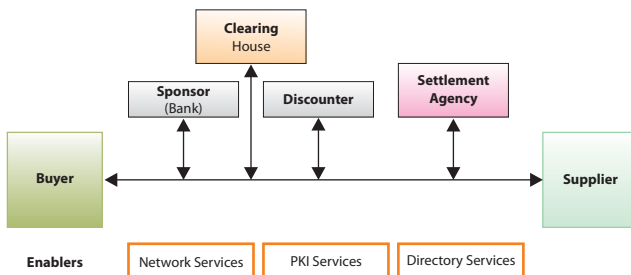

A solution that is all set to change the way businesses look at their invoice

Tangent introduces a path-breaking, innovative and secure supply chain finance (SCF) solution **CashCow⁺** that not only helps its customers in speeding up collection of receivables but also realizes the potential an invoice can bring into the business. For the businesses it enhances the productivity by increasing the cash inflow and there by making 'invoice the working capital'.

For the financiers it promises to be a new avenue for generating revenue and opens up a huge potential customer base that includes all the buyers and suppliers involved in the supply chain. With features like refer a buyer and rate a supplier, it helps the financier to make important decisions in building up relationships.

CashCow⁺ caters to the growing corporate demand for financially efficient supply chains, with companies and their suppliers under conflicting pressures to improve payment terms, reduce prices and improve cash flow efficiencies. It aims to improve the financial efficiency of the supply chain, resulting in both suppliers and buyers enjoying a substantial reduction in working capital.

The following schematic describes the mode of operation of different participants in payments process and different services that enable the transactions.

Innovative Approach

CashCow⁺ streamlines the execution of a supply chain finance solution through the complete automation of the financing process, bringing cash-flow benefits to both buyers and suppliers, and a simple, automated transaction management solution for financiers.

CashCow⁺ will build the applications, protocols and interfaces to facilitate global payments. It will also provide integration consultancy services to all parties involved in business payments.

CashCow⁺ will integrate the initial set of service providers required to complete business payments. The initial set will be a bank that can guarantee payments, process payments transactions and a discounter that can provide liquidity to payees.

Features:

1. Online invoice management and dispute resolution
2. Notifications, escalations and work flow to route the invoice automatically
3. Uses SSL and 2 way authentication and is highly secure and safe
4. Provision for multiple funding agents, suppliers and buyers
5. Completely customizable Key Performances Indicators (KPI) that enable quick decision-making
6. Rating of Suppliers by Buyers
7. Ability to integrate with popular ERPs
8. Easy to use and highly intuitive user interface- Uses the latest FLEX[®] technology from Adobe[®]
9. User centered interface design that ensures rich user experience

It is a unique payments approach that integrates multiple parties to provide a very comprehensive solution and that enables businesses to expand into new arenas by leveraging new payment processes that are better, faster and economical.

"Stretch your supplies not your payments."

Mirrority for everyone

Mirrority reflects the opinion of our society. Through Mirrority we desire to be a dependable, reliable and a preferred choice to make decisions.

An authentic source of information that people could depend on, use confidently in daily life, make decisions on lifestyle and environment. "A catalytic platform for the citizens to express opinions, experiences, grievances, elations and needs."

Provides a secured and structured platform for Venture Capitalists, Investors, Innovators, OEM vendors, manufacturers and skilled consultants to network for any business need.

This Business market place broadly caters to the following business stages:

New Business Ideas

Biznity provides a platform for Innovators and Angel Investors with matching requirements to meet. Innovators can bring their bright 'sellable' ideas to reality and Investors can select the ideas / new ventures they like to start up new avenues of businesses.

Innovators can upload their proof of concepts in the form of documents or videos supporting their ideas.

Continuing Business

Biznity not only fosters new business ideas and investors it also sets up a place for Original Equipment Vendors with spare capacity to find manufacturers thus increasing their mutual productivity.

The OEM vendors can along with their profile provide the details of the available spare capacity that can be viewed by the manufacturer who could leverage on the infrastructure available and increase production.

Business On Demand

Biznity provides a directory of skilled professionals that allows businesses to easily find, hire, manage and pay highly qualified professionals – for exactly what they need, when they need it.

Skilled professionals can create their profiles online and can get connected to the businesses looking for their expertise.

Businesses can leverage on the skills of the highly qualified professionals registered on Biznity and can focus on developing the business rather than looking for skilled professionals.

“It is everybody’s Business”

Do you have that spark in you?

In anguish for providing better services to the people and to provide better facilities to the citizens and we are forgetting our most important natural resource, the human resource.

The whole world is looking up to our country and we are respected for the intellect we have and the innovations we do.

With a creative thought of tapping this intellectual strength, Tangent in collaboration with the Government has initiated a small spark that has is capable of igniting a change, a change for the betterment of the society, a change in everyone's daily lives.

The spark that has the potential to enlighten many lives is what Thoughtspark is all about.

Thoughtspark is a forum for responsible citizens to contribute their constructive thoughts, creative ideas and innovative suggestions to create value for the society. This would not only allow an individual to share his thoughts but also would provide a platform wherein fellow citizens and the government officials can comment on the ideas suggested.

Thoughtspark would enable the government to harness the intellect of its citizens for better governance and for the benefit of the society. This provides a single point of knowledge base of the citizens thus allowing the government to know the pulse of the citizens and a way to capture 'the needs' of the citizens.

What does Thoughtspark have for a citizen?

- Share any constructive suggestion/ creative idea / process improvement with responsible government officials
- Implementation of the ideas, rewards and recognition
- Enhance the quality of life and society
- Platform to ignite a change in the society /system around you
- Chance to play a responsible part as a citizen in the betterment of the society – social consciousness
- To understand and know the different Government initiatives and provide feedback on them
- Platform to know the pulse of our fellow citizens

What does Thoughtspark have for the Government

- A single platform to capture and track the citizens' constructive thoughts
- To leverage on the collective intellect of the citizens
- A platform to directly understand the citizens' need and implement the solution suggested by them
- A centralized place to collect feedback on any new policies to initiatives before implementing them
- Smooth implementation of new policies
- Enhanced people support to the Government
- Enhancements in ongoing Govt. projects
- Overall growth of the country / state / society
- Happy, encouraged and motivated people
